

Project Executable Files

Date	11 July 2026
Team ID	xxxxxx
Project Name	StudyAI – Smart AI Study Companion & Quiz Generator
Maximum Marks	3 Marks

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not publicly hosted for this demo; run locally via the Flask dev server and React dev server (see Run Instructions)
Login Credentials (Demo)	Email:mallelaudaykumarreddy@gmail.com Password:123123
Platform / Hosting Provider	Local Flask development server + React development server (optional Ngrok tunnel for remote demo access)
Repository Link	https://github.com/mallelauday/StudyAI-platform.git
Demo Video Link	https://drive.google.com/file/d/1b25SFxDlM310Bk4PjCloCyRWNrVGCTcC/view?usp=drive_link

Step 4: Run Instructions

Pre-requisites:

- Python 3.11 or later
- Node.js 18+ and npm
- Git
- Firebase Project & Service Account Credentials
- Groq API Key
- Modern Web Browser (Google Chrome / Microsoft Edge)

Step 1

Clone the repository:

```
git clone https://github.com/mallelauday/StudyAI-platform.git
```

Step 2

Navigate to the backend folder and install Python dependencies:

```
cd backend  
pip install -r requirements.txt
```

Step 3

Create a .env file and configure:

- GROQ_API_KEY
- FIREBASE_PROJECT_ID
- FIREBASE_CLIENT_EMAIL
- FIREBASE_PRIVATE_KEY
- SECRET_KEY

Step 4

Start the Flask backend server:

```
python app.py  
The backend will run on:  
http://localhost:5000
```

Step 5

Open another terminal and navigate to the frontend:

```
cd frontend  
npm install  
npm run dev
```

Step 6

Open the application in your browser:

```
http://localhost:5173  
Login or register an account, upload study materials, and access AI-powered  
features such as summaries, flashcards, quizzes, study plans, and analytics.
```

Step 5: Known Issues / Limitations :

S.No	Known Issue / Limitation	Workaround / Status
1	AI-generated summaries, quizzes, and flashcards depend on the availability and response time of the Groq AI API.	API key is configured and error handling is implemented. If the AI service is unavailable, the system displays an error message and allows users to retry.
2	Large document uploads may take longer to process and may affect AI generation performance.	Currently optimized for normal-sized study materials. Future enhancement includes background processing and file size optimization.
3	User analytics and study progress tracking have limited historical data storage.	Basic tracking is implemented using the available database. Advanced analytics and long-term progress visualization are planned for future updates.
